purO3.com

MADE IN
THE USA

Ozonated Organic Oils

Our limited ingredient products contain only fresh, organic oils for the very best in natural skin and body care.

all about the
strength of ozone

Ozonated oils contain different amounts of ozone due to varying amounts of omega acids in each oil. The Potential Ozonide Index uses a simple formula to determine how many ozonides an oil can hold. The higher the POI, the stronger the ozone. Very high amounts may not be suitable for sensitive skin.

OZONATED ORGANIC COCONUT

Moisturizing organic coconut oil with O3 forms an oxygen-rich skin emollient. Excellent as an everyday moisturizer and massage oil. Can be used as a contouring cream to help the appearance of dimpled skin. Great for sensitive skin.

OZONATED ORGANIC CASTOR

Castor oil is popular for being antifungal, antiviral, and antibacterial. Because ozone is also known for destroying bacteria and viruses, it is a perfect compliment to the oil. Our castor oil is organic, cold pressed and hexane-free.

OZONATED ORGANIC JOJOBA

Jojoba oil takes on a creamy, luxurious consistency when infused with O3. This oxygen-rich cream, ideal for sensitive and blemish-prone skin types, is highly effective as an everyday face or body moisturizer. Also available with **Rose**.

OZONATED ORGANIC OLIVE

Our original, most popular formula. Organic olive oil, saturated with O3, forms a soothing, oxygen-rich skin salve. It may be helpful for the appearance of blemishes, age spots, wrinkles and fine lines, and for soothing skin irritations, redness, bug bites, and more.

OZONATED ORGANIC SUNFLOWER

Organic high-oleic sunflower oil, saturated with O3, forms a soothing, oxygen-rich skin salve. Popular in Europe, it may be helpful for many beauty uses as well as for soothing minor skin irritations, redness, and bug bites. Great for your pets, too!

OZONATED ORGANIC HEMP

Omega-rich organic hemp oil, infused with ozone, forms a water-resistant, oxygen-rich gel. It may help soothe minor skin irritations, bug bites, the appearance of blemishes, wound care and more. Hemp is the strongest oil and may not be suitable for sensitive skin.

Ozonated olive, sunflower, and hemp oils are also available in one ounce tubes!

Ozonated Oil Dental Care

OZONATED TOOTH & GUM SUPPORT

Peppermint | Peppermint Stevia | Cherry Stevia

Formulated from fully ozonated organic olive oil and organic hemp oil with a choice of flavors. There are no harmful preservatives or fluoride. Ozonated oils are used for a variety of gum and tooth issues. Ozone is being used more and more often for oral care. It is now easier to add ozone to your dental routine. Peppermint and Cherry/Stevia also available in one ounce tubes.

OZONATED OIL PULLING SOLUTION

Designed to enhance Ayurvedic oil pulling practices with the power of ozonation. Oil pulling is considered important for extracting unwanted microorganisms and toxins from the mouth in order to improve general wellbeing and oral health. Our solution combines ozone-infused organic coconut oil with organic sesame, sunflower and peppermint essential oils.

"I've been using this for 4 months now along with the tooth and gum support and tooth powder. This stuff is amazing!! Prevented a root canal or extraction from being done." - Michelle H.

OZONATED TOOTH CLEANING POWDER

Peppermint

Finally, there's a better way to keep your teeth clean with the power of ozone. Ozonated Tooth Cleaning Powder can help keep your mouth healthy and happy with all-natural ingredients. No fluoride, no artificial sweeteners, and no artificial additives. We use a proprietary, heat-free process to convert ozonated oil into a powdered form. In this form, the ozonated oil mixes better with other ingredients that are essential for cleaning your teeth.

Adding ozonated oils to tooth cleaning products creates a more robust antimicrobial effect than traditional toothpastes. Powders provide better abrasion to knock contaminants from the surface of your teeth and gums. It's an ideal option for those who want a natural option that is safe and effective.

NO
FLUORIDE

Ozonated Hygiene and Skin Care

OZONATED OIL DEODORANT

Jojoba | Jojoba with Orange and Bergamot

Made with certified organic ozonated jojoba and coconut oils, PurO3's Ozonated Oil Deodorant has made numerous customers exclaim, "Yeah, it really works!" With no aluminum or parabens, this is one of the purest options you can find. Lightly scented with orange and bergamot or fragrance free, the smooth roll on formula is ideal for those who want an effective solution with the added benefit of ozone but no overpowering smell.

OZONATED OIL SOAPS

Olive | Coconut | Jojoba

If you are looking for an ultra-clean feel, hand-crafted soap with ozonated olive, jojoba or coconut oil is a great solution. Ozonated oils provide safe and effective anti-microbial properties. These ultra-soothing, cruelty-free bars of handcrafted soap are made with the highest quality, all-natural ingredients. They are free from parabens, sulfates, and animal testing so you're free from stress, worry, and guilt.

OZONATED BEAUTY OIL

This premier blend is designed to enhance the beauty of your skin with all natural ingredients. Partially ozonated jojoba oil combines the many skin benefits of jojoba with an ozone enhancement. This serves as an ideal base for a number of popular beauty ingredients, including deodorized argan nut, rosehip seed, avocado, sweet almond, macadamia nut, pumpkin seed, borage seed, arnica flower extract, prickly pear seed, pomegranate seed, carrot seed, and seabuckthorn oils. The addition of sandalwood, patchouli, bergamot, melissa, hilechrysum, frankincense, agarwood, myrrh, jasmine, and rose absolute makes this oil one of the most anticipated products in the PurO3 ozonated line.

TOE & NAIL SUPPORT

PurO3 Toe & Nail Formula was created to deliver the antifungal powers of ozonated sunflower oil directly to the affected toe and nails.

PurO3 Toe and Nail Support is made from fully ozonated organic sunflower oil and is combined with DMSO, MCT oil, vitamin C and ozonated coconut oil. It comes with an easy-to-use applicator brush for proper application.

"Very good. It has helped a toenail fungus that has been hard to get rid of. Like the ozone scent a lot." - Teresah A.

Ozone Suppositories and Capsules

OZONATED OIL SUPPOSITORIES

Coconut/Vitamin E | Olive/Castor | Olive | Hemp

These suppositories contain all organic ingredients and are available in four types/strengths. Choose from Olive, Hemp, Olive/Castor, or Coconut w/ Vitamin E. Available in 10 or 30 count packages. POI (L to H): Coconut | Olive/Castor | Olive | Hemp

"I have used this product during a parasites cleaning, on a full moon protocol. I am really happy with the results. I feel much better and I gain energy. The suppositories are very easy to use and the size is perfect." - Montse

OZONATED OIL DIETARY SUPPLEMENTS

Olive | Hemp

Vegan capsules filled with 500mg of ozonated olive or ozonated hemp oil. For those who prefer internal applications, these capsules make it easy.

Our capsules contain the same ozonated olive and hemp oils you'll find in our regular jars, made with only high purity oxygen with no fillers, stabilizers, or other unnecessary ingredients.

PurO3 is the only company currently manufacturing 100% made in the USA ozonated oil capsules. Our capsules are filled in an FDA-approved facility to ensure the highest quality.

Ozone in the Outdoors

INSECT REPELLENT

PurO3 Insect Repellent is an all natural, Deet-free solution designed to help defend you against insects and bug bites. Comes in 4 ounce bottles.

Our insect repellent is a perfect fusion of ozonated olive oil, witch hazel, and a distinctive blend of rosemary, peppermint, and cedar oils. These carefully selected natural ingredients not only offer defense against insects but also provide a more pleasant fragrance than other conventional bug sprays.

Designed with your safety and the environment in mind, our PurO3 Insect Repellent is a testament to our commitment to eco-friendly solutions that do not compromise on efficacy. It is safe for all age groups and the perfect companion for any outdoor activity. Whether you're embarking on a hiking adventure, enjoying a tranquil picnic in the park, or just savoring a warm evening on your patio, this spray promises to provide you with a comfortable, bug-free experience. Plus you'll say goodbye to harsh chemicals like Deet.

BUG BITE RELIEF

This formula uses the best parts of nature to combat one of nature's biggest annoyances, in a convenient 1 ounce tube. Bug Bite Relief includes ozonated olive, sunflower and avocado oils, as well as rosemary oil and clove oil. Our all-natural ingredients were chosen for their specific benefits to help reduce itching and swelling caused by bug bites. The 1 ounce tube is easy to take with you, whether you're hiking in the mountains or enjoying a backyard barbeque.

SUN REPAIR LOTION

If you enjoy the outdoors, chances are you are exposing yourself to harmful UV light. This can damage the skin and cause premature aging. Sun Repair Lotion combines the healing properties of both ozonated coconut oil and aloe vera to form a soothing lotion to relieve skin that's been damaged by the sun.

Ozonated Coconut Oil can help accelerate healing of the skin and is considered hypoallergenic, which makes it ideal for just about anyone to use.

Aloe Vera is also known to aid in the repair of damaged skin. It provides a cooling sensation when applied to the skin, which is especially nice when dealing with sun damage. Comes in 8 ounce bottles.

Specialty Suppositories

Includes: L. casei, L. acidophilus, L. rhamnosus, L. paracasei, L. plantarum, L. bulgaricus, L. salivarius, L. delbrackii, L. helveticus, L. brevis, L. reuteri, L. gasseri, S. thermophilus, B. Bifidum, B. infantis, B. breve, B. longum, B. lactis, B. coagulans, Prebiotic (fructooligosaccharidesFOS)

PROBIOTIC SUPPOSITORIES

PurO3's probiotic suppositories are a multi-strain combination mixed with natural cocoa butter. Our cocoa butter is certified organic and naturally contains vitamins, minerals, and bioflavonoids with antioxidant properties. This serves as a base for our combination of 18 strains of beneficial bacteria along with a prebiotic.

Available in 10 or 20 count packages. Non-ozonated.

The benefit of using a suppository is that the total dosage of probiotics goes to the source of intestinal flora imbalance without having to be digested. When taken orally, anywhere from 1/2 to 3/4 or more of the strains do not make it past the stomach acids. Suppositories are a solution to this problem.

EDTA SUPPOSITORIES

Every day we are subjected to various forms of toxicity, whether from the food we eat or from the environment we live in. To help individuals counteract this issue, PurO3 is offering a suppository that contains EDTA and Vitamin C to help rid the body of these toxins. EDTA is known to bind heavy metals to itself, allowing the body to excrete the heavy metals from the body. Vitamin C helps assist in this process.

Limited ingredients: made with natural organic cocoa butter as the carrier with food-grade EDTA and Vitamin C.

Available in 10 or 30 count packages. Non-ozonated.

METHYLENE BLUE SUPPOSITORIES

Methylene Blue Suppositories are designed to deliver the benefits of methylene blue directly to your body in a convenient, easy-to-use form.

These suppositories are formulated for efficient absorption, ensuring that you receive the full potential wellness benefits of methylene blue. This compound has a long history of use in various health applications. Recognized for its potential in supporting cellular health and cognitive function, methylene blue is becoming an increasingly popular wellness supplement.

Unlike oral supplements, suppositories bypass the digestive system, allowing for direct absorption into the bloodstream. This can result in more effective and efficient delivery of the active ingredients.

Available in 20 count packages. Non-ozonated.

OZONATED GLYCERIN

Glycerin is a plant-derived, clear, odorless liquid prized for its hydrating properties and ability to draw moisture to the skin. When glycerin is infused with ozone, it has similar properties to ozone-infused water, but in a much more stable, longer-lasting form. When used on the skin, it hydrates and helps heal and reduce hyperpigmentation. Ozone-infused glycerin provides many additional benefits and can be used orally.

Simple, safe, and pure: We produce PurO3 ozone-infused glycerin with 99.9% pure oxygen that we feed into ultra-pure ozone generators. We process the ozone and glycerin in all-glass vessels to ensure it remains contaminant-free. Once the process is complete, we package the ozone-infused glycerin in all-glass containers and ship it within three days so you get the purest product possible.

"This product is awesome. Used it for dental infection and for breathing. It should be in every medicine cabinet in the country." - Aleae P.

"So far have used on face and it is helping reduce some hyperpigmentation. Use with brushing my teeth as well. No heavy ozone smell." - Shari D.
